Testing frequency: annual, 3 yrs, other			
Age of piping (years)			
Piping leak detection system now used:			
Secondary containment now used for each tank:			
Dispenser method (i.e., submersible, suction, gravity, etc.)			
Identify piping system corrosion protection installed:			

## **Insurer Program Disclosure**

It is understood and agreed that prior to coverage being provided, the Applicant, as a precedent to coverage being offered, agrees to and understands the following:

- A. Claims expense and defense costs are included within the combined single Limit of liability and annual aggregate on the Policy. However, a separate claims expense and defense cost benefit has been added to the primary combined single Limit of liability, as a separate coverage providing benefits up to 25% of the Limit of liability provided under the Policy issued;
- B. The program requires that certain 1992 and some 1998 EPA standards must be met by all Tanks and connecting Piping prior to coverage being provided. The Insurer may permit these standards to be complied with by offering up to 180 days, after the effective date of coverage, for the Insured to meet the minimum standards established under the program;
- C. The fee for inspections, claims, engineering and audits, include a one-time charge by the Insurer to perform a 30-day product inventory and audit review. This inventory and audit review will be performed by the Insurer's designated auditing firm, prior to coverage being effected. The Insurer also has a one-time site inspection charge included as part of each Insured's coverage.
- D. Damage and repair to Tanks, connecting Pipe, pumps, and other business and personal property of the Insured are specifically excluded under the Policy;
- E. The coverage provided will specifically insure each location/site separately. Each Tank and its Piping at each site will be specifically identified and coverage provided only for those Tanks listed in the coverage contract. No coverage will be in effect for sites or specific Tanks on any site that is not specifically listed. If a charge has not been made for a specific Tank and its Piping, then no coverage is in effect. Only Tanks and Tank Piping found in compliance as of the effective date of coverage will be provided coverage under the Policy issued:
- F. All and any existing or previous pollution or contamination on the site or location is specifically excluded. The Insurer may void coverage within 15 months of the effective date of coverage, due to pre-existing conditions on the site location.
- G. The Insurer makes no assertion, evaluation, determination, or otherwise assumes any responsibility that the liability insurance purchased under Program II will be adequate to comply with Federal Law. The Insurer also does not assume, or offer any guarantee, that any state-funded program will either pay benefits, or be able to pay benefits up to or in excess of any insurance provided under Program II.
- H. The Policy issued by the Insurer has a special pre-existing conditions exclusion, and a coordination of benefits provision as a condition of coverage being provided to each Insured.

NOTE: The Insurer will provide up to \$1,000,000 combined single limit and annual aggregate limit as excess over, and not in addition to, any primary coverage you select as self-insurance, or have in effect under some other program.

## **REPRESENTATIONS AND WARRANTIES**

The "Applicant" is the party to be named as the "Insured" in any insuring contract if issued. By signing this Application, the Applicant for insurance hereby represents and warrants that the information provided in the Application, together with all supplemental information and documents provided in conjunction with the Application, is true, correct, inclusive of all relevant and material information necessary for the Insurer to accurately and completely assess the Application, and is not misleading in any way. The Applicant further represents that the Applicant understands and agrees as follows: (i) the Insurer can and will rely upon the Application and supplemental information provided by the Applicant, and any other relevant information, to assess the Applicant's request for insurance coverage and to quote and potentially bind, price, and provide coverage; (ii) the Application and all supplemental information and documents provided in conjunction with the Application are warranties that will become a part of any coverage contract that may be issued; (iii) the submission of an Application or the payment of any premium does not obligate the Insurer to quote, bind, or provide insurance coverage; and (iv) in the event the Applicant has or does provide any false, misleading, or incomplete information in conjunction with the Application, any coverage provided will be deemed void from initial issuance.

The Applicant hereby authorizes the Insurer and its agents to gather any additional information the Insurer deems necessary to process the Application for quoting, binding, pricing, and providing insurance coverage including, but not limited to, gathering information from federal, state, and industry regulatory authorities, insurers, creditors, customers, financial institutions, and credit rating agencies. The Insurer has no obligation to gather any information nor verify any information received from the Applicant or any other person or entity. The Applicant expressly authorizes the release of information regarding the Applicant's losses, financial information, or any regulatory compliance issues to this Insurer in conjunction with consideration of the Application.

The Applicant further represents that the Applicant understands and agrees the Insurer may: (i) present a quote with a Sublimit of liability for certain exposures, (ii) quote certain coverages with certain activities, events, services, or waivers excluded from the quote, and (iii) offer several optional quotes for consideration by the Applicant for insurance coverage. In the event coverage is offered, such coverage will not become effective until the Insurer's accounting office receives the required premium payment.

The Applicant agrees that the Insurer and any party from whom the Insurer may request information in conjunction with the Application may treat the Applicant's facsimile signature on the Application as an original signature for all purposes.

The Applicant acknowledges that under any insuring contract issued, the following provisions will apply:

- 1. A single Accident, or the accumulation of more than one Accident during the Policy Period, may cause the per Accident Limit and/or the annual aggregate maximum Limit of Liability to be exhausted, at which time the Insured will have no further benefits under the Policy.
- 2. The Insured may request the Insurer to reinstate the original Limit of Liability for the remainder of the Policy period for an additional coverage charge, as may be calculated and offered by the Insurer. The Insurer is under no obligation to accept the Insured's request.
- 3. The Applicant understands and agrees that the Insurer has no obligation to notify the Insured of the possibility that the maximum Limit of Liability may be exhausted by any Accident or combination of Accidents that may occur during the Policy Period. The Insured must determine if additional coverage should be purchased. The Insurer is expressly not obligated to make a determination about additional coverage, nor advise the Insured concerning additional coverage.
- 4. The Insurer is herein released and relieved from any and all responsibility to notify the Insured of the possible reduction in any applicable Limit of Liability. The Insured herein assumes the sole and individual responsibility to evaluate, consider, and initiate a request for additional coverage or reinstatement of the annual aggregate Limit of Liability which may be exhausted by any single Accident or combination of Accidents during the Policy Period.
